## Naming living things

If you want to find the name of a plant or animal you could look through books until you see a picture of it. Or you could use a key.

## Keys

The simplest keyss are made up of short, numbered sentences arranged in pairs. Look at the example below. Read the instructions, then use this key to name the insects drawn on this page.

## How to use the key

Read the first pair of descriptions and decide which fit the insect you are trying to name. Opposite the description you choose there is a number. This number tells you which pair of descriptions to read next. Read them, and again decide which describes the insect. Opposite, you will find either the insect's name, or the number of the next pair of descriptions to read. Carry on until you find the
 insect's name.

## An example of a key

1 Wings visible
Wings not visible
2 Three-pronged tail
Pincers at end of tail

- 3 Two pairs of wings

One pair of wings
4 Wings fringed with hairs Wings not fringed with hairs
5 Legs longer than body Legs not longer than body
6 Wings larger than body Wings not larger than body

Answer all the questions.
1 Fig. 1.1 shows a mayfly nymph (a larva) that lives in water.

Fig. 1.1
(a) (i) List two features, visible in Fig. 1.1, that show this is an insect.
1.

2.
(ii) What special adaptation does the insect shown in Fig. 1.1 have that allows it to live in water?
$\qquad$
(b) Fig 1.2 shows five mayfly nymphs.

Use the key below to identify the species of each mayfly.

|  |  | species |
| :--- | :--- | :---: |
| 1 | Rear pair of legs point towards tails $\quad$ go to 2 |  |
|  | Rear pair of legs point forwards or sideways $\quad$ go to 3 |  |
| 2 | Gills project sideways from body <br>  <br> Gills folded over body | Paraleptophlebia |
| Ephemera |  |  |

Write the diagram letter of each of the species in the correct box of Table 1.1.
Table 1.1

1 Fig.1.1 shows the shells of five molluscs.
A

Fig.1.1
Use the key to identify each of the molluscs which normally live inside the shells.
Write the name of each mollusc in the correct box of Table 1.1.
As you work through the key, tick $(\checkmark)$ the boxes in Table 1.1 to show how you identified each mollusc.

## Key

|  | name of mollusc |
| :---: | :---: |
| 1 (a) Shell made of two parts | go to 2 |
| (b) Shell made of one part only | go to 3 |
| 2 (a) Both shell halves have ridges running down the shell | Cardium |
| (b) Both shell halves are smooth | Venerupis |
| 3 (a) Shell tightly coiled | go to 4 |
| (b) Shell conical with no coil | Patella |
| 4 (a) Bottom coil less than a quarter of the length of the shell | Turritella |
| (b) Bottom coil more than half of the length of the shell | Buccinum |
